

Breakaway

Offered at Pitt Meadows Arenas

Craig Millin

7

Consumer Tips:

1. Make sure staff are certified.
2. Instructor: participant ratio 1-8
3. Review program content to make sure they are offering what you're looking for.
4. Skill based vs drill based - make sure kids are learning technical instruction
5. Avoid all flash & no substance - providers who fill 60 minutes with parent pleasing drills that don't teach.
6. Make sure you are getting good value for your \$\$\$
7. Avoid anyone who claims they can make your child a professional player!

Welcome to our Summer Programs - Standing the test of time.

Entering our 36th year in providing summer hockey schools RPM has become the benchmark all other providers compare to for quality programs, costs and the desired results. We offer programming for every level whether you are a beginner a recreational hockey player or a Rep Level Player. These programs have stood the test of time and provide you with flexibility to place the emphasis where you need it the most. We've been around along time most of our competitors are long gone and there are always going to be new start ups. The question you have to ask is do you want to attend programs from a provider who says they can get you the results or a provider who has been getting the job done for 36 years? Our programs run throughout August and are aligned to fit within minor hockey and family time. In 2015 we had over 600 players attend our summer programs!

RPM's Power Skating & Hockey Skills Program

Skate, Skate, Skate - From one end to the other RPM has your skating needs covered.

Did you know that RPM staff are certified power skating instructors we teach to national standards providing certified instruction thru the Canadian Figure Skating Association. RPM has taken the best of both worlds combining Power Skating technics with Hockey Development. The end result is a technical based program that instructs the detail of skating as it relates to playing hockey. RPM delivers in its Power Skating Program thru Power Skating & Hockey Skills + This program addresses all skating skills and also combines the skating with the necessary puck skills. After all Power Skating isn't just with out a puck players need to be able to control the puck, pass and shoot while using proper power skating techniques. During the month of August RPM dedicates 3 weeks to Power Skating for Hockey 1-4, Atom & Pee Wee. It should be noted that Power Skating is taught at all of our programs as one of the skills addressed. The Power Skating Hockey Skills + is your dedicated priority Power Skating Camp.

Power Skating & Hockey Skills +

New to Hockey

August 22-August 26

Hockey 1-4

August 02 to August 06
August 15 to August 19
August 22 to August 26

Atom/Pee Wee

August 02 to August 06
August 15 to August 19
August 22 to August 26

"I thought you were excellent, and I loved the rapport you had with the kids...I thought the very individualized attention, instruction and feedback on shooting was great!"
M Millar

RPM getting it right for over 30 years!

We've had some pretty good hockey players come thru RPM over the years...players who made RPM part of their regular development ... these guys didn't just attend a one week hockey school they made RPM an integral part of their development thru their minor hockey years.

The hockey academy allowed me to refine my skills while playing Major Midget. Patrick Weirloch NHL 2008 Ottawa Senators

RPM Alumni - we are often asked about our alumni and have any players made it to the big time? Yes of course and we have too many to name and even more that went on to College and Junior Hockey. The Alumni pictured here weren't fly by nighters attending the odd RPM camp in their youth - No these guys used RPM as a primary means to acquire the skills to make junior/college hockey and beyond. They attended our inseason programs, hockey academies, summer hockey schools and small groups or private instruction.

RPM Alumni
'I Miss you guys and the RPM skates, I am forever grateful for all of the help you gave me along my journey'.
Brendan Dillon #4
San Jose Sharks

Quote of the Month

I have to let you know that this has been an excellent year for Trent to start a new school. He has blended in nicely with the new school system. He was able to use the academy as a way to meet new friends and quickly understand the school environment. He has furthered his hockey development beyond our expectations. He likes the coaches and the academy and it keeps him wanting to get up every morning and get to school!
